**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stass (6,723,148 B2).

Stass discloses a retainer apparatus (20) for attaching a component to a vehicle structure comprising a molded component including a base portion (36) having at least one attachment member (54) and the attachment member (54) being integrally formed as one piece with the base portion (36), the attachment member (54) including a body or a post (72) extending out from the surface to be engaged with an opening (56) of the lower mold portion (40) so that the base portion (36) and the lower mold portion (40) can be in snap-fit sealed position (see Fig. 5, col. 2, line 44 through col. 3, line 20). It

would have been obvious to a person having ordinary skill in the art at the time the invention was made to provide the attachment member as taught by Stass to effectively facilitate the moldable snap-fit connection for a filter housing.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Cappuyns (6,152,979) discloses an air cleaner filter with removable jacket.
- Bloomer (6,299,661 B1) discloses a twist fit connection for air cleaners.
- Ohnishi et al (6,705,650 B2) disclose a fastening structure.
